

RotaTap

Rod Rotators

SAFETY + TIME

Does not require removal of the rod clamps

(which is time consuming and high risk work)

COST SAVINGS

Reduce well maintenance costs and maintain consistent production levels

PRECISION

Height adjustability up to 12" allows for precise placement of the rod string

WELL PROFILES HAVE CHANGED AND SO HAS ROD ROTATOR TECHNOLOGY.

RotaTap is a next-generation rod rotator manufactured for longevity with premium bearings, quality components and high alloy steel. It utilizes a patent pending approach to solve ongoing challenges related to traditional rod rotators.

After three years of field-testing, RotaTap has proven to be reliable and durable. Plus, RotaTap reduces maintenance costs while improving productivity and efficiency.
