

Safety and accuracy when spacing a well are critical, and Rotatap can help.

## **PRECISION**

Highly accurate rod string placement with up to 18" height adjustability to improve pump performance

## SAFETY

Reduce risk & save time (3-4× faster) by eliminating the need to remove rod clamps when adjusting the rod string

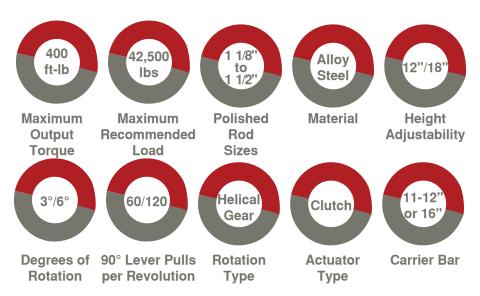

## **COST SAVINGS**

Improved rod string & rod rotator longevity, less pump wear & failure, lower maintenance and downtime

## Rota Tap

The RotaTap is a dual-purpose rod string spacing tool and rod rotator.

Silverstream's patented design solves ongoing challenges related to traditional rod string spacing practices and rod rotator failures. Manufactured with premium bearings and high alloy steel, the weather sealed RotaTap stands up to the harshest conditions. RotaTap is safe, effective, and field proven. Improve production and reduce downtime with the Rotatap.
